

Jeremy M. Parker

909-725-5132 — jeremyparker@gmail.com — jeremy.life

I am inherently a problem solver, love to figure things out and improve on its experience. I am adept at guiding teams in developing innovative solutions that enhance products in creative and unique ways. I am an expert in UI/UX Design and Code Development with more than 25 years of professional experience. Throughout my career, you will see my work with global companies, impactful non-profits, and dynamic startups.

Skills and Software

- Product Ownership, Project Management, Code Reviews, Backlog Clearing, Bug Hunts
- Design, Concept, Creative, Graphics, Research, HCI, Analytics, SEO
- Components, Plug-Ins, Responsive Design, REST/SOAP API Development, GraphQL
- JavaScript (React, Vue, Angular), Typescript, Next.js, Laravel, Python, SQL+, PHP, HTML, CSS, and to a working extent C+
- DevOps, Azure, AWS, Gitlab, CI/CD, Microservices, Version Control, Spring Boot
- Wireframes, JEO (Journey/Experience/Opportunity) Mapping, Workflows, Prototypes, Usability Testing
- Figma, Adobe CC Suite, Sketch, FigJam, Miro, Zeplin, Maze
- Design Frameworks, SDLC, Technical Requirements, Enterprise Development, Team Director
- Git, PyCharm, PostgreSQL, VSC, Node, NPM, FTP, MySQL, Linux
- Best Practices, Accessibility (WCAG 2.0 Level AA)

Work History

Jeremy.life, Founder, Designer, Engineer, UX Professional, Consultant, *2010 – Present*

Projects include:

- PoleStar Designs — Branding Agency. Built *hive.co* web page from PSD file (2025–2026)
- Voicero.ai — AI Development. LLM, Data-Driven Modeling, User Programmed Learning, Voice-to-Text, Text-to-Voice (2024–2025)
- Sierra Division — e-Learning website for Game Development and Graphics in Unreal Engine and Cryengine (2025)
- Hospitality: Luminous Hotel Management, Web Designer and Developer (2022–2023)
- Finance B2B: Reliant Funding, Senior Mobile Developer, LLM, text-to-speech, AI Chatbot, Flutter (2022–2024)
- Pharmaceutical Advertising: Carling Technologies (agency), Senior Mobile Developer for Pharmaceutical Division (2020–2023)
- Healthcare: Premier Healthcare Management, Senior UX Engineer (2019–2021)
- Non-profit: Earth Day Network, Director of Web (2016–2018)
- Non-profit: American Staffing Association, Web Team Manager (2012–2016)
- Marketing: Real Magnet (agency), Web Producer (2010–2018)

Large-scale and long-term Projects:

Bobrick Washroom Equipment, Product Designer and Senior UI/UX Engineer, *2024*

- Designed and built a SaaS app for web and mobile platforms, focusing on cost savings and worldwide scalability in 35 global locations.
- Integrated Azure DevOps with MS Active Directory to enable smooth deployment and authentication universally on any device.
- Developed and executed an API-driven microservices architecture to enhance system efficiency, flexibility, and resilience.
- Compiled data summaries and worked with stakeholders to establish technical requirements, documentation, and product roadmaps.
- Cultivated an environment that encouraged ongoing learning and professional development successfully.
- Managed the team consisting of 2 CMS full stack devs, 1 graphic designer, 1 brand ambassador, and 1 product designer.

Fluence Energy, Senior UI/UX Engineer with promotion to Product Owner, *2022–2023*

- Successfully guided my team by finalizing prototypes before deadlines, opening a buffer between development and design phases.
- Created and enhanced full-stack applications, part of which was incorporating authentication through AWS OAUTH.
- Led the design and creation of new features and implementation processes, from wireframes to prototypes to beta-versions.
- Directed a team of engineers, designers, and product managers to foster product innovation within an agile framework.
- Implemented established best practices, facilitated sprint planning, refined the backlog, and managed stakeholder relationships.
- Enhanced user interface and user experience through design choices established in research and iterative sessions.

Informer Systems (Schedule Express), Product Designer & Full-Stack Developer, *2019–2022*

- Created and developed a cloud-based SaaS scheduling platform tailored for public sector police, fire/EMS, and admin management.
- Designed the architecture for both front-end (Vue.js, REST APIs), and back-end using PostgreSQL and jQuery database connections.
- Successfully transitioned from a Waterfall methodology to Agile using Jira, which fortified productivity, collaboration, and auditing.
- Constructed a role-based access control system to implement controls for security and accessibility.
- Incorporated third-party APIs and developed tailored automation tools to objectify user workflows.
- Enhanced database performance through the refactoring of queries and the optimization of indexing strategies reducing load.
- Facilitated technical training sessions aimed at mentoring junior developers and improving code reliability.

Marriott Hotels, Web Manager, 2014–2019

- Developed project work plans and managed a team of content creators, developers, external vendors, and stakeholders.
- Spearheaded the creation of five brand websites and a mobile application for collaborations with the NBA, NCAA, and Olympics.
- Created customized JavaScript components and RESTful APIs to connect the booking system with customer analytics.
- Implemented data-informed approaches to boost user interactions and increased conversion rates from 1.75% to 2.5%
- Developed and implemented A/B testing experiments aimed at increasing user interactions, improving retention by 11%
- Managed a group of designers and developers, performing code evaluations and offering technical guidance.
- Designed real-time data visualization dashboards aimed at tracking KPIs and facilitating better decision-making.
- Collaborated with the marketing and engineering departments to design high-impact digital experiences.

Education

University of Maryland, College Park, 2002–2007

- Dual major: B.S. Computer Science, B.S. Psychology
- AAS Audio Engineering and Sound Design
- Dean's List and President's List for all semesters
- Phi Beta Kappa Honor Society

FAQ

- US Citizen
- I live in California, USA (PST time zone). I am looking to relocate to MST or PST from small town Ridgecrest, CA
- I have worked in EST/CST/MST during my time at Fluence, Informer, and Marriott from PST without issue.

Work Ethic, Energy, Personality

As an enthusiastic and imaginative individual, I thrive in productivity. I am the person who ensures projects are completed ahead of schedule. I take pleasure in introducing bold, innovative ideas, and a distinct viewpoint to each project. This has enabled me to guide teams and utilize my skills in product ownership, user experience, scope research, code development, analytics, and innovation.

As you peruse my resume and portfolio, you will discover how I have accomplished extensive goals and acquired significant experience across various fields throughout my career—and this has been intentional. I have sought to learn from some of the most brilliant individuals and transformative companies. Consequently, I have developed into a versatile professional with the expertise and experience to support it. My journey commenced when I assisted my father in operating his business, which focused on building computers and networks in the 1990s. Stemming from modest beginnings to overseeing the product design and influential voice of global organizations.

With a comprehensive understanding of my abilities, I would like to share a little about my personal character: I am diligent in and dedicated to my work. I pride myself on being a perfectionist and enjoy taking on leadership roles. I find inspiration in others and strive to be a guiding force achieving best quality and performing results. In my free time, I enjoy making music, gaming, traveling, and cooking.

Thanks!
